

ZinMet®

POULTRY

ZinMet® is a combined source of organic trace minerals - Zinc and Chromium. The unique complexation of these minerals to a specific organic escort allows improved mineral retention in the body¹ and improved growth performance^{1,2,3} by broilers.

ZinMet® contains these two vital trace minerals bound to methionine, an essential amino acid, and is available in a powdered form that can be added to stock feeds according to the required feeding rate.

Broiler performance is enhanced with ZinMet® giving the following positive responses:

- Improved feed conversion
- Improved weight gain.
- Greater retention of zinc in the body.

Composition

Zinc Methionine Complex, Chromium Methionine Complex.

Specifications	ZinMet® 100 Liquid	ZinMet® 50 Dry
Description	A lavender coloured aqueous solution	Free flowing dry form
Composition	10.00% Zinc 834ppm Chromium 20.00% Methionine	5.00% Zinc 417ppm 10.00% Methionine
Packaging	20kg bags	20kg bags
Normal usage rate	0.40kg/per tonne	0.8kg/per tonne

Compatible with most animal feeds and all processed feed ingredients.
