**MANUFACTURED IN AUSTRALIA**

# FlakeRite®

FlakeRite® is a non-ionic water surfactant that is non-corrosive, will not irritate the skin, damage clothing or footwear and does not accelerate mill wear. Analysis has shown it will reduce the surface tension of water by over 50% (72 dynes down to 32 dynes).

## Grain Conditioning

FlakeRite® will assist water to penetrate more evenly and deeper into grain particles enabling better retention of moisture in rations with the following benefits:

- Reduced energy requirements to mill the grain
- Reduced wear on milling equipment
- Minimal loss or shrinkage of grain caused by processing
- Reduced grain fines and less dust
- Effectively increases grain moisture

## Grain Flaking

FlakeRite® will assist water to penetrate more evenly and deeper into grain particles enabling better transfer of heat with the following positive benefits:

- Improved flake roll life
- Reduced energy requirements
- Savings in maintenance costs
- Improved physical form of flakes and reduced fines
- Reduced variability in grain moisture levels

## Molasses

FlakeRite® added to molasses will assist with the ease of flow and pumping with the following benefits:

- Less handling problems in colder weather
- Reduced energy costs in pumping
- Reduced residue build-up in handling equipment
- Improved molasses distribution in rations

## FlakeRite

<b>Description</b>	A free flowing aqueous solution
<b>Colour</b>	Red/yellow
<b>Packaging</b>	1,000kg modules or 25kg drums
<b>Usage Rates</b>	Grain 60grams/t Molasses 200grams/t
