

# ZinMet®

## POULTRY

MANUFACTURED IN AUSTRALIA

ZinMet® is a combined source of organic trace minerals - Zinc and Chromium. The unique complexation of these minerals to a specific organic escort allows improved mineral retention in the body<sup>1</sup> and improved growth performance<sup>1,2,3</sup> by broilers.

ZinMet® contains these two vital trace minerals bound to methionine, an essential amino acid, and is available in a powdered form that can be added to stock feeds according to the required feeding rate.

Broiler performance is enhanced with ZinMet® giving the following positive responses:

- Improved feed conversion
- Improved weight gain.
- Greater retention of zinc in the body.

### Composition

Zinc Methionine Complex, Chromium Methionine Complex.

Specifications	ZinMet® 100 Dry
Description	Free-flowing, dry form
Composition	10.00% Zinc 695ppm Chromium 20.00% Methionine
Packaging	25kg bags
Normal usage rate	40mg/kg Zinc

Compatible with most animal feeds and all processed feed ingredients.
